

KAZI MOHAMMED ARSH

Junior AI Engineer | Machine Learning | MLOps | Azure AI | LLMs | NLP Mumbai, India |
arsh.lakers@gmail.com | +91 91671 91639 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Junior AI Engineer with 4 years of enterprise Python and data engineering experience at Tata Consultancy Services (TCS), and an MSc in Artificial Intelligence (Distinction) from the University of East London. Specialised in end-to-end ML pipeline development, GenAI solutions, and advanced RAG architectures. Hands-on experience with Azure AI Foundry, Azure ML, and the Azure model catalog for building, tuning, and evaluating production-grade models. Proficient in LLM integration (OpenAI, Hugging Face), agentic workflows, and Explainable AI (SHAP, LIME).

TECHNICAL SKILLS

- **Generative AI & LLMs:** OpenAI GPT, Hugging Face Transformers, LangChain, LangGraph, RAG Pipelines, Advanced Prompt Engineering, Agentic Workflows.
- **ML & Model Development:** Scikit-learn, XGBoost, TensorFlow, Keras, PyTorch, MLP Neural Networks, Random Forest, Logistic Regression.
- **Model Training & Evaluation:** Cross-validation, ROC-AUC, F1/Precision/Recall, SMOTE, Hyperparameter Tuning, Model Benchmarking.
- **Feature Engineering & NLP:** Pandas, NumPy, LabelEncoder, StandardScaler, Tokenization, Text Classification, Embedding Generation, Vector Search.
- **Model Deployment & MLOps:** Azure AI Foundry, Azure ML, Azure Model Catalog, MLflow, FastAPI, Flask, Docker, CI/CD Pipelines, AWS CloudWatch.
- **Vector Databases:** FAISS, Pinecone, Chroma, Weaviate.
- **Data Engineering:** ETL Pipelines, SQL, Apache Spark, PySpark, AWS S3, MongoDB.
- **Languages & Tools:** Python (Advanced), SQL, JavaScript, Bash, Git, Linux, Jupyter, VS Code.

WORK EXPERIENCE

AI Engineer (GenAI & Data Operations) — Vibrant Minds After School Club | **May 2024 – Jun 2026**

- Built smart, agentic workflows and automated query-handling pipelines, leveraging vector databases (FAISS/Chroma) to deliver context-aware, highly accurate prompt responses.

- Optimized data preprocessing architectures for unstructured text documents, directly scaling internal database query response speed and maintaining zero-latency LLM completions.

Python Developer & Data Engineer — Tata Consultancy Services (TCS) | Sep 2021 – Sep 2023

- Collaborated with international client teams to design and deploy Python automation scripts that integrated enterprise LLM workflows into existing data infrastructure, consistently maintaining over a 95% threshold with zero SLA breaches.
- Developed cloud-based data preprocessing pipelines and orchestrated agentic AI workflows on Linux server environments, validating multi-source datasets to ensure highly accurate enterprise context window retrieval.

Technical Operations Manager (Part-Time) — Evya Lounge | Nov 2024 – Dec 2025

- Applied structured data tracking and operational analytics to manage inventory, staff performance, and business workflows.

EDUCATION

- **MSc Artificial Intelligence** — University of East London, UK | **2024 – 2025**
 - *Passed with Distinction | Modules: Machine Learning, Deep Learning, NLP, Intelligent Systems, AI Ethics*
- **BSc Information Technology** — Lala Lajpat Rai College, Mumbai University | **2018 – 2021**
 - *CGPI: 7.22 | Mumbai, India*

PROJECTS

- **Customer Churn Prediction (MSc Dissertation) | [Project Link](#)** Engineered a full end-to-end ML pipeline benchmarking XGBoost and Random Forest, using SMOTE to handle imbalance and SHAP/LIME for explainable AI.
- **Domain Name Price Prediction (Intelligent Systems) | [Project Link](#)** Designed a supervised ML classification pipeline handling 6.8 million records using text-based NLP feature extraction and an MLP Neural Network.

CERTIFICATIONS

- 100 Days of Code: Python Pro Bootcamp — Udemy | 2023
- Full Stack Web Development Bootcamp — Udemy | 2023

VOLUNTEERING

- **Volunteer** — RightWay Organisation, Nagpada, Mumbai | **Feb 2021 – Aug 2024**
Coordinated large-scale logistics, resource distribution, and data tracking for educational supply community drives across Mumbai.
